Tests for an existing feature

#f69094d8-84c

failed

Single test case

✕ No creator — you can't tell which requests are yours

✕ No date/time — no sense of order or recency

✕ No title — must open each one to know what it was

✕ Raw UUID — impossible to remember or reference

✕ No search or filter

Proposed — ownership visible & filterable

AFTER

● My requests

All

①

Created by: Anyone ▾

②

Status: All ▾

③

🔍 Search request text or REQ ID...

④

Created: Any date ▾

⑤

Placement: the filter bar sits directly on top of the queue it filters — not in the right detail panel, not on a separate page. The **My requests** toggle is separated out because it's the one-click, high-frequency action.

REQ-1041

 copy

failed

1 case

Total Endowment Overview — charts visible with legends, no loading spinners...

 QA · 5 Jul, 4:12 PM

REQ-1040

 copy

duplicate

1 case

Search 'AQR' and open the fund detail result...

 QA · 4 Jul, 9:03 AM

What each number does (matches proposal §2.5–2.6)

- ① **My requests** — one click filters to you (the 80% case). Persists across reloads.
- ② **Created by** — pick any user; for PO/BA reviewing a person's work.
- ③ **Status** — All / Successful / Failed / Duplicate / Rejected.
- ④ **Search** — request text or REQ ID; debounced, no full-page refresh. Prevents duplicates.
- ⑤ **Created date** — optional range, collapsed by default.

Enriched rows — **REQ-####** + copy, status, one-line friendly **creator · timestamp · case count** . These three facts are what the Teams thread was missing.

Colours/layout approximate the current QOps dark theme; final spacing to match the live design system.
